D-SCOUR PASTE™

Australia: CONCENTRATED MULTI-STRAIN PROBIOTIC WITH GARLIC EXTRACT AS AN AID IN THE TREATMENT AND CONTROL OF SCOUR IN ANIMALS.

New Zealand: CONCENTRATED MULTI-STRAIN PROBIOTIC WITH GARLIC EXTRACT FOR ANIMALS AFFECTED BY STRESS* OR DIETARY SCOURS.

PRESENTATION: Oral paste in dial-a-dose syringe.

ACTIVE CONSTITUENTS:

(Australia)

Each gram contains: 180 million CFU as: *Lactobacillus acidophilus*, *Lactobacillus delbrueckii* subspecies *bulgaricus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*, *Bifidobacterium bifidum*, *Enterococcus faecium*, *Streptococcus salivarius* subspecies *thermophilus* and 20 mg Garlic Extract (*Allium sativum*).

(New Zealand)

Each gram contains: 180 million CFU as: *Lactobacillus acidophilus*, *Lactobacillus delbrueckii* subspecies *bulgaricus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*, *Bifidobacterium bifidum*, *Enterococcus faecium*, *Streptococcus salivarius* subspecies *thermophilus*. Also includes Garlic Extract (*Allium sativum*).

PROPERTIES:

(Australia)

D-SCOUR PASTE™ has been formulated to control scours through the combined action of selected natural live micro-organisms (probiotics) complemented by a natural yet powerful antimicrobial. The combination is synergistic for a number of reasons, including the fact that the antimicrobial portion does not affect the probiotics, yet both components attack the micro-organisms which cause scouring without affecting the beneficial bacteria within the animal's gut. This is particularly important when treating animals with enteric disease caused by *E. coli*, Rotavirus or *Candida* spp. and microbial-mediated diseases of the urogenital tract, where for example, *Candida albicans* is implicated. Garlic has been used for thousands of years for its nutritional and medicinal properties but it has only been in recent times that manufacturing processes have been developed to protect and stabilise its important antimicrobial active, allicin. Another major plus for this product is that it does not contain any chemical or antibiotic components, simply ingredients developed by Mother Nature. In contrast, antibiotics used to treat scours act by destroying target pathogens but at the same time they also destroy beneficial digestive bacteria.

(New Zealand)

Concentrated multi-strain probiotic with garlic extract for animals affected by stress (associated with pregnancy, birth, weaning and transportation, loss of appetite, scouring and temperature extremes, medication, surgery, training and exercise) or dietary scours.

DOSAGE & ADMINISTRATION:

(Australia)

RESTRAINT: D-SCOUR PASTE™ should not be used in conjunction with Penicillins, Cephalosporins, Tetracyclines, Avoparcin, Gentomycin, Lincomycin, Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics.

(New Zealand)

RESTRAINT: Using concurrently with some antibiotics may compromise beneficial effects. Probiotic efficacy may be reduced if used in conjunction with some antibiotics. Seek veterinary advice in severe or non-responsive cases.

(Australia & New Zealand)

Depress plunger into the mouth, ensure paste is administered on the rear of the tongue. Hold animal's head raised for a few seconds after dosing to ensure the paste is swallowed. Use recommended dose at first signs of stress* or infection. Administer daily for up to 5 days, or as directed by a veterinarian.

SPECIES	DOSAGE
HORSES:	10 – 20 g
FOALS/PONIES:	5 – 10 g
CATTLE:	2 – 4 g
CALVES:	1 – 2 g
SHEEP/GOATS:	2 – 4 g
LAMBS/KIDS:	1 – 2 g
PIGS:	2 – 4 g
PIGLETS:	1 – 2 g

* (associated with pregnancy, birth, weaning, and transportation, loss of appetite, scouring and temperature extremes, medication, surgery, training and exercise).

WITHHOLDING PERIOD: MEAT: NIL; MILK: NIL (Australia)

WITHHOLDING PERIOD: NIL (New Zealand)

TRADE ADVICE: EXPORT SLAUGHTER INTERVAL (ESI): ESI not required. (Australia)

POISONS SCHEDULE: EXEMPT (Australia)

REGULATORY STATUS: Australia: AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY

New Zealand: EXEMPT

PACK SIZES: 30 g syringe (20 per carton)
100 g syringe (15 per carton)
