

**DUSTLESS\***

## **DAIRY AID™ with FLAVECO™**

**DUSTLESS\* VITAMIN & MINERAL SUPPLEMENT WITH FLAVECO™  
FOR LACTATING DAIRY COWS.**

**PRESENTATION:** Dustless\* powder.

**ACTIVE CONSTITUENTS** Each 5 g dose contains:

		NRC#			NRC#
VITAMIN A	52,000 I.U.	100%	COBALT	10 mg	100%
VITAMIN D <sub>3</sub>	4,000 I.U.	25%	COPPER	160 mg	100%
VITAMIN E	120 I.U.	50%	IRON	200 mg	25%
IODINE	3.2 mg	35%	MANGANESE	320 mg	50%
SELENIUM	5 mg	100%	ZINC	1,000 mg	100%
			FLAVOPHOSPHOLIPOL as Flaveco™	20 mg	

(These levels of active constituents are minimal levels).

# Percentage of the National Research Council (NRC) requirements for a 500 kg dairy cow producing greater than 25 L of milk per day.

**PROPERTIES: KEYMIX® DAIRY AID™ with FLAVECO™** is a concentrated formulation containing flavophospholipol, all essential trace-minerals with high level of zinc, and fat soluble vitamins A, D<sub>3</sub>, and E for lactating cows.

Vitamins and trace-minerals are especially required by high producing animals to improve health, maintain vitality and appetite. High producing animals for production of milk, growth and efficient reproduction especially require vitamins and trace-minerals. They improve feed nutrient value of the total ration by supplementing those nutrients, which are missing or low in pastures, commonly used grain, protein meals and hay or silage. Deficiency symptoms are usually in the form of sub-optimal production, reduced fertility and herd health problems. Obviously a balanced feed has benefits in improving feed conversion, building health and optimising production and fertility.

FLAVECO, an antibiotic exclusively developed for nutritional use is added for improved growth rates and increases feed conversion efficiency in calves and cattle, and increased milk yield without dropping milk fat and protein content in dairy cattle. FLAVECO works differently when compared to other performance promoters or ionophores. It is very safe with no toxicity problems as can occur with ionophores, and is not absorbed into the blood stream resulting in zero residues level in meat and milk while being completely safe for farm workers. In addition, it is non-toxic for horses, dogs, poultry and other animal species. Flaveco is added for improved growth rates and increases feed conversion efficiency in calves and cattle. It also increases milk production without dropping milk fat and protein content and benefits reproductive performance.

**DOSE AND ADMINISTRATION:** Mix DAIRY AID with FLAVECO at a rate of 5.0 g/head/day

DAIRY AID with FLAVECO may be fed continuously before and during lactation.

**WITHHOLDING PERIODS: MEAT & MILK – NIL.**

**TRADE ADVICE: EXPORT SLAUGHTER INTERVAL (ESI):** This product does not have an ESI established. For advice on the ESI, contact the manufacturer on (02) 9672 7944 before using this product.

**POISONS SCHEDULE:** S6 (Due to the inclusion of selenium).

**REGULATORY STATUS:** EXEMPT.

**PACK SIZE:** 25 kg (Contains 5,000 x 5 g doses).
