GLUTACIDE™

DISINFECTANT – COMMERCIAL GRADE

ALL-PURPOSE SURFACE DISINFECTANT AND CLEANER FOR ANIMAL AND BIRD HOUSING.

PRESENTATION: Concentrated solution for dilution with water.

ACTIVE CONSTITUENTS: Each L contains:

GLUTARALDEHYDE	151 g
QUATERNARY AMMONIUM COMPOUND	104 g

PROPERTIES: KEYMIX® GLUTACIDE™ is an all-purpose surface disinfectant and cleaner for animal and bird housing. Both active ingredients of GLUTACIDE™ combine to provide strong biocidal activity against micro-organisms. Glutaraldehyde is chemically related to formaldehyde with a similar antiseptic and disinfectant efficiency, but greater safety than formaldehyde. Quaternary ammonium compounds have well-established disinfectant qualities, plus excellent detergent, surface spread and penetration characteristics.

GLUTACIDE™ kills bacteria, fungi, viruses, protozoa and yeasts. It is a highly effective all-purpose surface disinfectant for use in the animal industries. GLUTACIDE™ has a rapid action and remains active for several days on treated surfaces. All animal and bird housing systems may be safely and effectively cleaned and disinfected using GLUTACIDE™. The product is not formulated or intended for use directly on animals or birds, however, but is suitable for all animal contact areas. GLUTACIDE™ is non-staining and non-corrosive.

DIRECTIONS FOR USE:

RESTRAINTS: DO NOT USE ON ANIMALS OR BIRDS.

SITUATION	RATE	CRITICAL COMMENTS
Floors, walls and fittings of hatcheries layer and broiler sheds, stables, kennels, piggeries, dairies, yards, stalls, tables and surgical equipment.	1:100 (10mL to each 1 Litre)	Wash down to reduce bulk contaminant may be necessary. Diluted product may be sprayed or washed onto surfaces. Has residual action and if left in contact with surfaces will remain active for 5-7 days.
	1:50 (20mL to each 1 Litre)	May be used in areas with high contaminant build-up.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIODS: NOT REQUIRED WHEN USED AS DIRECTED. (Australia)

GENERAL INSTRUCTIONS:

Discard diluted solutions 7 days after preparation. DO NOT mix with detergents or other chemicals.

PROTECTION OF LIVESTOCK:

DO NOT allow birds or other animals back into area until treatment has been absorbed or has dried.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT:

Toxic to fish. DO NOT contaminate ponds, rivers or waterways with the chemical or used containers.

POISONS SCHEDULE: S6 (POISON) (Australia)

NOTE: Read safety directions on label before use.

REGULATORY STATUS: Australia: AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY
New Zealand: EXEMPT

PACK SIZES:

1 L	(at 10 mL/L = approximately 400 square metres)
5 L	(at 10 mL/L = approximately 2,000 square metres)
25 L	(at 10 mL/L = approximately 10,000 square metres)
200 L	(at 10 mL/L = approximately 80,000 square metres)
