HORSPORT REHYDRATION & RECOVERY™

ORAL REHYDRATION LIQUID CONCENTRATE FOR PERFORMANCE HORSES INCLUDING TRAINING, RACING, STOCKHORSES, SHOW JUMPERS, CAMPDRAFTERS, POLO & POLOCROSSE AND ENDURANCE HORSES.

PRESENTATION: Clear, brown liquid.

ACTIVE CONSTITUENTS: Each L contains:

SODIUM	21 g	POTASSIUM	7.5 g
CHLORIDE	32 g	PHOSPHATE	18.1 g
GLYCINE	40 g	GLUCOSE	260 g
CITRATE	3.4 g		

PROPERTIES:

HARDOCK'S® HORSPORT REHYDRATION & RECOVERY™ is a combination of electrolytes, glycine and glucose, which aids rehydration and helps replace electrolytes lost through sweating during strenuous physical exercise and travelling especially during hot weather. Rehydration is a very important issue in performance horses as it means faster recovery and a longer peak performance period, with the animal being able to back up faster (e.g. more frequent racing).

HORSPORT REHYDRATION & RECOVERY™ contains essential electrolytes lost in sweat during exercise, with glucose to promote uptake of sodium salt into the blood and glycine to assist overall electrolyte and fluid replacement. **HORSPORT REHYDRATION & RECOVERY™** is suitable for use with all types of performance horses, including horses in training, racing, stockhorses, show jumpers, campdraft horses, polo, polocrosse and endurance horses. **HORSPORT REHYDRATION & RECOVERY™** should always be given with water, as it is this process, osmosis, which allows water to cross the gut wall into the bloodstream to replace those elements originally lost through sweat.

DOSAGE & ADMINISTRATION:

ADEQUATE CLEAN DRINKING WATER SHOULD BE AVAILABLE AT ALL TIMES WHEN USING HORSPORT. DILUTE HORSPORT IN CLEAN, FRESH WATER BEFORE USE.

Give diluted **HORSPORT REHYDRATION & RECOVERY™** after exercise or during work to aid recovery and rehydration.

LIGHT WORK: Dilute 40 mL **HORSPORT** in at least 2 L of drinking water. Horses over 300 kg should be given 4 L of diluted solution. Ponies (under 300 kg) should be given 2 L of diluted solution.

HEAVY WORK: Dilute 80 mL **HORSPORT** in at least 2 L of drinking water. Horses over 300 kg should be given 8 L of diluted solution. Ponies (under 300 kg) should be given 4 L of diluted solution.

ENDURANCE RIDING: Dilute **HORSPORT** at a rate of 80 mL in 2 L of drinking water and give at least 2 L of diluted solution as often as possible during the event. During excessive sweating, dilute **HORSPORT** at a rate of 80 mL per litre to aid increased rehydration and electrolyte replacement. It is recommended that electrolyte replacers such as **ELECTROMIX ELECTROLYTES & SWEAT™** also be used routinely in feed to ensure electrolyte needs are satisfied. **HORSPORT** may be further diluted to suit the taste of individual horses.

MEAT WITHHOLDING PERIOD: NIL (Australia)

POISONS SCHEDULE: NOT APPLICABLE (Australia)

REGULATORY STATUS: Australia: END product (Excluded Nutritional or Digestive product)
New Zealand: EXEMPT

PACK SIZES: 1 L (contains 25 x 40 mL doses)
5 L (contains 125 x 40 mL doses)

Australia-Wide Toll Free: 1800 801 201

New Zealand Toll Free: 0800 424 999 (0800 IAH 999)
