LIVAMOL® Grooming Range

*THE PERFECT GROOMING PARTNER TO **LIVAMOL®**, AUSTRALIA'S LEADING COAT CONDITIONER.*

PRESENTATION: This range of products has been specifically designed to complement Livamol.

PROPERTIES: In the preparation of show animals, LIVAMOL has been the outstanding supplement for improving coat condition for more than 50 years – and the first step when superior grooming is required.

- **LIVAMOL® SUDS -** highly effective shampoo and conditioner that helps maintain top coat appearance. It foams away dirt and dust easily while imparting that silky smooth feel you only get from an effective formulation. Rinses easily from the coat.
- **LIVAMOL® BLU** - especially formulated to shift stubborn stains and dirt from coat, mane and tail of animals of any colours. Its effectiveness is quickly visible by brightening darker colours and 'whitening' whites and greys. Fast acting, it dries to a glistening finish after the first wash.
- **LIVAMOL® GLO –** helps to protect the coat and repel dirt and dust, whilst adding a brilliant, lasting final finish. It is very effective on all coat colours including white and black. Ideal for keeping manes and tails manageable, tangle-free and glistening.

DIRECTIONS FOR USE:

May irritate the eyes. Avoid contact and protect eyes while using. If splashed in eyes, wash it out immediately with large quantity of water.
