PROPERTIES: Vitamins are essential for metabolic functions; energy utilisation and vitality, while minerals and trace-minerals have extremely diverse actions. They range from structural functions in some tissues, to a variety of regulatory functions in other tissues. If these nutrients are not supplied in adequate amounts by the ration, growth and development, reproduction, lactation and natural resistance against stress and disease will be adversely affected.

KEYMIX® GENERAL PURPOSE PIG PREMIX™ provides supplementary levels of the major vitamins and minerals required by pigs of all ages. Its ingredients will maximise performance and reduce the risk of nutrient deficiencies that might occur because of variations in feed quality, environment, health, genetics and animal performance on individual farms.

For maximum benefit, **GENERAL PURPOSE PIG PREMIX™** should be added to rations, which contain balanced levels of protein, energy, salt, calcium and phosphorus.
