VITAMIN E	11 I.U.	MANGANESE	8.5 mg
VITAMIN B ₂	3 mg	SULFUR	57.5 mg
CALCIUM		COPPER	7.5 mg
PANTOTHENATE	6 mg	COBALT	0.2 mg
NICOTINAMIDE	12.5 mg	IODINE	0.75 mg
VITAMIN B ₁₂	25 µg	PRO(N8)URE®	7 g
MAGNESIUM	3.5 mg		

NUTRITIONAL INFORMATION:

PROTEIN	Min. 25 %
FAT	Min. 3 %
FIBRE	Min. 6 %
CALCIUM (Ca)	Min. 0.6 % - Max. 1.0 %
PHOSPHORUS (P)	Min. 0.5 % - Max. 0.9 %
SALT (NaCl)	Min. 0.2 % - Max. 0.6 %
FLUORINE (F)	Max. 0.01 %
Digestible Energy (DE)	16 MJ/kg.
Metabolisable Energy (ME)	13 MJ/kg Ruminant.

PROPERTIES: MANOMIX® is a concentrated, pelletised source of crude protein, amino acids, vitamins and minerals for use as an animal feed supplement to increase the nutrient content of the feed. It is manufactured from high-quality, highly digestible meals including soyabean and selected protein meals with added whey, yeast, trace minerals and fat, plus flavourings and palatability enhancers. PRO(N8)URE® combines 3 essential elements: dual strain probiotic, a prebiotic and multi-strain enzyme forming a natural microflora management tool for improved digestion resulting in better performance and good health.

MANOMIX® is recommended as a concentrated, highly digestible nutrient source for all stock, especially the young, aged, growing or performance animal or those under stress or recovering from illness or injury. MANOMIX® is an excellent first solid feed for young animals. Provide MANOMIX® as soon as the young animal commences to take solid food. The high quality ingredients in MANOMIX® are not only beneficial to young animals, but also provide an ideal supplement for animals of all ages including breeding, those subjected to the stress of hard work and those convalescing.

DOSAGE AND ADMINISTRATION: MANOMIX® may be mixed into formulated rations, or added as a separate feed. When formulating, nutritional information may be obtained from the back panel of the bag, or by contacting International Animal Health Products. Feeding guide: (Please refer also to the pack)
