PRON8URE® PROFESSIONAL

PRON8URE® PROFESSIONAL IS A MULTI-STRAIN PROBIOTIC CONTAINING LIVE BENEFICIAL BACTERIA.

PRESENTATION: Water soluble formula containing 180 million CFU/g.

ACTIVE CONSTITUENTS: Each g contains: *Lactobacillus acidophilus*, *Lactobacillus delbrueckii* subspecies *bulgaricus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*; *Bifidobacterium bifidum*; *Enterococcus faecium*; *Streptococcus salivarius* subspecies *thermophilus*.

PROPERTIES: PRON8URE® is a blend of live viable microbes which benefits the host animal by improving the intestinal microbial balance. Everyday use of PRON8URE® helps maintain a balanced digestive system, thus optimising digestion of feed and enhancing your animals' health, naturally. These microbes are safe, non-toxic and residue free.

PRON8URE® may be used during periods of stress (stresses disrupt the normal intestinal balance), e.g. overcrowding, pregnancy and lactation, scouring and diarrhoea, temperature extremes, transportation, training and exercise, and medication; and following animal husbandry procedures or practices such as antibiotic use, birth, castration, debeaking/dehorning, diet changes, loss of appetite, surgery, vaccination, weaning and worming. PRON8URE® is compatible with feed ingredients including anthelmintics, coccidiostats, minerals and vitamins, and some antibiotics.

Indications for use (Australia):

- An aid during periods of intestinal dysfunction in all animals, including treatment and control of scouring or diarrhoea, exclusion and suppression of pathogens such as *E. coli*, *Salmonella* spp. and *Aeromonas* spp.
- Post-antibiotic therapy in all animals for the re-establishment of gut microflora following antibiotic usage.
- Improved weight gains and feed conversion in growing pigs and cattle.
- Productivity improvements and reduced mortality in poultry.
- Aids in the establishment of gastrointestinal microflora of physiologically immature animals, e.g. day old chicks, neonatal calves, pigs, foals, lambs and kids, puppies and kittens.

Indications for use (New Zealand):

- An aid during periods of intestinal dysfunction in all animals.
- Post-antibiotic therapy in all animals for the re-establishment of gut microflora following antibiotic use.
- Improved weight gains and feed conversion in growing pigs and cattle.
- Productivity improvements and reduced mortality in poultry.
- Aids in the establishment of gastrointestinal microflora of physiologically immature animals, e.g. day old chicks, neonatal calves, pigs, foals, lambs and kids, puppies and kittens.

DOSAGE AND ADMINISTRATION:

(Australia)

RESTRAINT: PRON8URE® should not be used in conjunction with Penicillins, Cephalosporins, Tetracyclines, Avoparcin, Gentomycin, Lincomycin, Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics. For use by or under the supervision of a registered veterinarian.

(New Zealand)

RESTRAINT: Using concurrently with some antibiotics may compromise beneficial effects. PRON8URE® efficacy may be reduced if used in conjunction with some antibiotics. Please contact International Animal Health Products for advice regarding the use of PRON8URE® in conjunction with antibiotics.

(Australia & New Zealand)

Individual Dose: Use at stress levels for the first 5 days then at the maintenance dose level. **In-Feed:** Refer to label for instructions.

PRODUCT ►	PRON8URE PROFESSIONAL*	
SPECIES	INDIVIDUAL DOSE (per head per day)	
	Maintenance	Stress
HORSES:	10 g	20 g
FOALS/PONIES:	5 g	10 g
CATTLE:	2 g	4 g
CALVES:	1 g	2 g
SHEEP/GOATS:	2 g	4 g
LAMBS/KIDS:	1 g	2 g
PIGS:	2 g	4 g
PIGLETS:	1 g	2 g
DOGS:	1-3 g	2-6 g♦
PUPS/KITTENS:	1 g	2 g
CATS:	1 g	2 g
POULTRY:		
CHICKS	1 g/L**	
BROILERS/LAYERS	500g/500 L**	
CAGED BIRDS:	1 g/L**	

NOTE: A sachet holds 2 g.
* Use as a guide only. Rates may vary depending on daily feed intakes.
♦ (Small - 2 g, Medium - 4 g, Large - 6 g).
** Add ProN8ure Professional to drinking water – make fresh daily.
For other animals contact International Animal Health Products.

WITHHOLDING PERIODS: MEAT: NIL; MILK: NIL; EGGS: NIL

TRADE ADVICE: EXPORT SLAUGHTER INTERVAL (ESI): ESI not required. (Australia)

POISONS SCHEDULE: EXEMPT (Australia)

REGULATORY STATUS: Australia: AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY
New Zealand: EXEMPT
