

ProN8ure®

ProN8ure® is a multi-strain probiotic containing live beneficial bacteria

PRESENTATION: There are different types of ProN8ure®:

ProN8ure® POWDER - In feed formula containing 60 million colony forming units (CFU)/g

ProN8ure® SOLUBLE - Water soluble formula containing 180 million CFU/g

ProN8ure® PASTE - Oral paste formula containing 180 million CFU/g

ProN8ure® LIQUID - Oil based formula containing 180 million CFU/mL

ACTIVE CONSTITUENTS: Each g or mL contains: *Lactobacillus acidophilus*, *Lactobacillus delbrueckii* subspecies *bulgaricus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*; *Bifidobacterium bifidum*; *Enterococcus faecium*; *Streptococcus salivarius* subspecies *thermophilus*.

PROPERTIES: ProN8ure® is a blend of live viable microbes which benefits the host animal by improving the intestinal microbial balance.

Everyday use of ProN8ure® helps maintain a balanced digestive system, thus optimising digestion of feed and enhancing your animals' health, naturally. These microbes are safe, non-toxic and residue free.

ProN8ure® may be used during periods of stress (stresses disrupt the normal intestinal balance), e.g. overcrowding, pregnancy and lactation, scouring and diarrhoea, temperature extremes, transportation, training and exercise, and medication; and following animal husbandry procedures or practices such as antibiotic use, birth, castration, debeaking/dehorning, diet changes, loss of appetite, surgery, vaccination, weaning and worming. ProN8ure® is compatible with feed ingredients including anthelmintics, coccidiostats, minerals and vitamins, and some antibiotics.

Indications for use:

- An aid during periods of intestinal dysfunction in all animals, including treatment and control of scouring or diarrhoea, exclusion and suppression of pathogens such as E. coli, Salmonella spp. and Aeromonas spp.
- Post-antibiotic therapy in all animals for the re-establishment of gut microflora following antibiotic usage.
- Improved weight gains and feed conversion in growing pigs and cattle.
- Productivity improvements and reduced mortality in poultry.
- Aids in the establishment of gastrointestinal microflora of physiologically immature animals, e.g. day-old chicks, neonatal calves, pigs, foals, lambs and kids, puppies and kittens.

DOSAGE AND ADMINISTRATION:

RESTRAINT: ProN8ure® should not be used in conjunction with Penicillins, Cephalosporins, Tetracyclines, Avoparcin, Gentamicin, Lincomycin, Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics.

Individual Dose: Use at stress levels for the first 5 days then at the maintenance dose level. In-Feed: Refer to label for instructions.
