

ProN8ure®

ProN8ure® is a multi-strain probiotic containing live beneficial bacteria

PRESENTATION: There are different types of **ProN8ure®**:

- ProN8ure® POWDER - In feed formula containing 60 million colony forming units (CFU)/g
- ProN8ure® SOLUBLE - Water soluble formula containing 180 million CFU/g
- ProN8ure® PASTE - Oral paste formula containing 180 million CFU/g
- ProN8ure® LIQUID - Oil based formula containing 180 million CFU/mL

ACTIVE CONSTITUENTS: Each g or mL contains: *Lactobacillus acidophilus*, *Lactobacillus delbrueckii* subspecies *bulgaricus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*; *Bifidobacterium bifidum*; *Enterococcus faecium*; *Streptococcus salivarius* subspecies *thermophilus*.

PROPERTIES: ProN8ure® is a blend of live viable microbes which benefits the host animal by improving the intestinal microbial balance. Everyday use of ProN8ure® helps maintain a balanced digestive system, thus optimising digestion of feed and enhancing your animals' health, naturally. These microbes are safe, non-toxic and residue free.

ProN8ure® may be used during periods of stress (stresses disrupt the normal intestinal balance), e.g. overcrowding, pregnancy and lactation, scouring and diarrhoea, temperature extremes, transportation, training and exercise, and medication; and following animal husbandry procedures or practices such as antibiotic use, birth, castration, debeaking/dehorning, diet changes, loss of appetite, surgery, vaccination, weaning and worming. ProN8ure® is compatible with feed ingredients including anthelmintics, coccidiostats, minerals and vitamins, and some antibiotics.

Indications for use:

- An aid during periods of intestinal dysfunction in all animals.
- Post-antibiotic therapy in all animals for the re-establishment of gut microflora following antibiotic use.
- Improved weight gains and feed conversion in growing pigs and cattle.
- Productivity improvements and reduced mortality in poultry.
- Aids in the establishment of gastrointestinal microflora of physiologically immature animals, e.g. day-old chicks, neonatal calves, pigs, foals, lambs and kids, puppies and kittens.

DOSAGE AND ADMINISTRATION:

RESTRAINT: Using concurrently with some antibiotics may compromise beneficial effects. ProN8ure® efficacy may be reduced if used in conjunction with some antibiotics. Please contact International Animal Health Products for advice regarding the use of ProN8ure® in conjunction with antibiotics.

Individual Dose: Use at stress levels for the first 5 days then at the maintenance dose level.						In-Feed: Refer to label for instructions.
