| COBALT                 | 320 µg     | IODINE    | 135 µg | PROTEIN    | 20 g            |
| COPPER                 | 5 mg       | ZINC      | 50 mg  | PRON8URE®  | 120 million CFU |

These levels of active constituents are minimum levels.

**PROPERTIES:** PROPACA with PRON8URE® supplies a specific premix package, including meals containing quality protein and high energy with molasses and fish oil. This pioneer formulation is a nutritious and palatable supplement unique to the Australian camelid industry. PROPACA with PRON8URE® will aid in the production of high quality, versatile natural fiber. It will positively benefit show animals, improving coat condition and color, as well as supplementing the diet of young cria for better growth and performance. Particular emphasis is given to the high nutrient demands of gestation, lactation and reproduction.

PRON8URE® is included in PROPACA to maximize growth rates and protect cria from scour-inducing bacteria. The beneficial bacteria in PRON8URE® help to quickly establish a healthy population of gut microflora, which in turn helps protect them from overgrowth of harmful strains, as well as aiding a digestive efficiency and improving the utilization of feed. PRON8URE® helps improve growth rates, feed conversion and enhances health naturally. PRON8URE® is non-hormonal, environmentally safe, residue free and has a nil withholding period. No other product can make these claims.

Innovative research and technology combined with our in-house nutritional consultancy team are proud to advance alpaca and llama nutrition in line with breeder's ambitions. The product of the future is here today – PROPACA with PRON8URE®.

### DIRECTION FOR USE:

**RESTRAINT:** Product containing PRON8URE® should not be used in conjunction with Penicillin's, Cephalosporins, Tetracyclines, Avoparcin, Gentamycin, Lincomycin Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics.

Feed PROPACA with PRON8URE® by mixing into feed or by sprinkling product over feed or ration. The rates given below are a guide:

|                       |                 |                     |                 |
|-----------------------|-----------------|---------------------|-----------------|
| Lactating alpacas     | 120 g /head/day | Cria (3 - 6 months) | 40 g /head/day  |
| Adult alpacas         | 100 g /head/day | Cria (< 3 months)   | 20 g /head/day  |
| Tuis (12–24 months)   | 80 g /head/day  | Adult llamas        | 120 g /head/day |
| Weaners (6–12 months) | 60 g /head/day  | Camels              | 150 g /head/day |

**MEAT WITHHOLDING PERIOD: NIL**
