COBALT	320 µg	IODINE	135 µg	PROTEIN	20 g
COPPER	5 mg	ZINC	50 mg	PRONSURE®	120 million CFU

These levels of active constituents are minimum levels.

PROPERTIES: PROPACA™ with PRONSURE® supplies a specific premix package, including meals containing quality protein and high energy with molasses and cod liver oil. This pioneer formulation is a nutritious and palatable supplement unique to the Australian camelid industry. PROPACA™ with PRONSURE® will aid in the production of high quality, versatile natural fibre. It will positively benefit show animals, improving coat condition and colour, as well as supplementing the diet of young cria for better growth and performance. Particular emphasis is given to the high nutrient demands of gestation, lactation and reproduction.

PRONSURE® is included in PROPACA™ to maximise growth rates and protect cria from scour-inducing bacteria. The beneficial bacteria in PRONSURE® help to quickly establish a healthy population of gut microflora, which in turn helps protect them from overgrowth of harmful strains, as well as aiding a digestive efficiency and improving the utilisation of feed. PRONSURE® helps improve growth rates, feed conversion and enhances health naturally. PRONSURE® is non-hormonal, environmentally safe, residue free and has a nil withholding period. No other product can make these claims.

Innovative research and technology combined with our in-house nutritional consultancy team are proud to advance alpaca and llama nutrition in line with breeder's ambitions. The product of the future is here today – PROPACA™ with PRONSURE®.

DIRECTION FOR USE:

RESTRAINT: Product containing PRONSURE® should not be used in conjunction with Penicillins, Cephalosporins, Tetracyclines, Avoparcin, Gentamycin, Lincomycin Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics.

Feed PROPACA™ with PRONSURE® by mixing into feed or by sprinkling product over feed or ration. The rates given below are a guide:

Lactating alpacas	120 g /head/day	Cria (3 - 6 months)	40 g /head/day
Adult alpacas	100 g /head/day	Cria (< 3 months)	20 g /head/day
Tuis (12–24 months)	80 g /head/day	Adult llamas	120 g /head/day
Weaners (6–12 months)	60 g /head/day	Camels	150 g /head/day

MEAT WITHHOLDING PERIOD: NIL

POISONS SCHEDULE: S6 (due to inclusion of selenium)

REGULATORY STATUS: EXEMPT

PACK SIZES: 20 kg
