			PRON8URE®		300 Million CFU

The percentage of the National Research Council (NRC), 1989 maintenance requirements for a 500 kg horse.

PROPERTIES:

Australia and New Zealand

FARNAM® VITAM® PLUS HEALTH & VITALITY™ with 12 vitamins, 9 minerals and **PRON8URE®** is formulated to improve feed nutrient value by delivering nutrients which may be missing or undersupplied in common feedstuffs. It provides high levels of vitamins and minerals, and **PRON8URE®** multi-strain probiotic, to assist in achieving optimum performance for growing, exercising and breeding horses. **PRON8URE®** is a blend of live viable microbes which benefits the horse by improving its intestinal microbial balance. These microbes are safe, non-toxic and residue free. **PRON8URE®** helps to improve the general health and performance of the horse. It reduces digestive disturbances and upsets, stimulates appetite, optimises digestion of feed and reduces stress naturally. **PRON8URE®** also helps to establish (immature animals), re-establish (after antibiotic treatment) and maintain a balanced gastrointestinal microflora.

DOSAGE & ADMINISTRATION:

(Australia)

RESTRAINT: PRON8URE® should not be used in conjunction with Penicillins, Cephalosporins, Tetracyclines, Avoparcin, Gentomycin, Lincomycin, Streptomycin, Tiamulin or Tylosin, but may be used immediately following these antibiotics.

(New Zealand)

RESTRAINT: Using concurrently with some antibiotics may compromise beneficial effects. PRON8URE® efficacy may be reduced if used in conjunction with some antibiotics. Please contact International Animal Health Products for advice regarding the use of PRON8URE® in conjunction with antibiotics.

(Australia & New Zealand)

VITAM® PLUS HEALTH & VITALITY™ should be provided daily to ensure correct intake. For best results use in conjunction with **CALCIPLEX BONE AND JOINT™**. For individual use, mix with dry feed either morning or night meal. One level scoop contains 35 g.
